EZ Photo Wrap is a perfect fit into today's offering of framing systems and is ideally suited for interior décor, corporate environments, retail and exhibition signage.

Creating a EZ Photo Wrap does not require specialist skills and is finished within minutes. The finishing of a EZ Photo Wrap starts from a pre-cut adhesive coated corrugated board where your canvas or

photo print is applied to and fold to the edges. Quick and easy with no need for staples or glue. The result is remarkable.

A stylish, professional quality image display and feather light so can be hung from just one tack. It's design makes you saving money on shipping and installation costs when compared to traditional wooden stretcher bars.

EZ Photo Wrap is compatible with canvas media and photo prints.

Step 1: The 2 parts needed for assembly to a finished EZ Photo Wrap (EZ Photo Wrap and your media; Canvas / PHOTO PRINT).

Step 2: Remove part of the release liner and align your print with the interior perforated line.

Step 3: Fold back your media, remove the rest of the release liner, place your print over the exposed adhesive and apply pressure to secure it in place.

Step 4: Pre-fold all the creased lines on the back of the frame.

Step 5: Remove the excess media across each of the corner sections by using a scissor.

Step 6: Fold-up one edge of the frame, release the perforated tabs and fold the edge around till it forms a square.

Step 7: Keeping the edge square, apply firm pressure to secure the tabs to the back of the frame and apply this for all 4 edges.

Step 8: Gently support each corner to keep it square and apply the corner sticker.

Step 9: Fold the edges of the backing tray-up and place it into the back of the frame and press firmly in the centre to secure it to the adhesive.

Step 10: The EZ Photo Wrap is now ready to hang-up.
